18. Have you ever worked all night or more than 24 hours on a project? Yes No

For each question that you answered yes, give yourself one point.

Total these points and then compare the total to the scale below to check the probability of becoming wealthy.

Score	Probability of Becoming Rich
1-5	Low
6-10	Average
11-15	Very likely
16-18	You are on your way!

Even if you scored low on the test, don't worry about it. A low score simply means that if you don't change some things in your life, the probability of becoming wealthy is low. All you have to do is be willing to make some changes. Regardless of your score, you can achieve wealth. Your score just identifies your weak points. Take a moment and look at the questions to which you answered "No."

These are your areas of weakness. By identifying these areas now, you will recognize the solutions as you study Wealth Foundation, Part 1, The Basics of Getting Rich. They reflect the areas that you need to change.
